

### **Additions and Adjustments**

We offer a range of additives that we store on site and are available at your request to add to your product prior to bottling.

The additives that we store on site are:

- Copper Sulphate (excluding organic product)
- Malic Acid
- Citric Acid
- Liquid Sulphur Dioxide
- PMS
- Tartaric Acid
- Ascorbic Acid
- Nitrogen and Carbon Dioxide and Mixed Gases.

Any additions required that are not listed above may be possible and can be confirmed by calling our laboratory staff.
