

BOTTLING FILTRATION GUIDE

Recommended turbidity levels for sterile and non-sterile bottling are as below:

NTU	FILTRATION
<1.0	0.45 (Sterile)
<1.0	60's (Non Sterile)
<20.0	30's (Non Sterile)
<35.0	10's (Non Sterile)
<45.0	5's (Non Sterile)
>45	Screen / Sieve

NOTE: The above levels are guides only.
Please check bottling authorisations to ensure products fall within these levels for each filtration type
